

SUMMARY

Multilingual professional with a background spanning finance, operations, and technology. Experienced in managing high-volume financial systems, risk analysis, and process optimization, I excel at turning complex challenges into practical solutions. Having lived and worked across Indonesia, China, and the Philippines, I bring cross-cultural adaptability, strong communication, and a calm, analytical approach under pressure. Now expanding my expertise in web and software development, aiming to integrate my financial background with technical skills to build meaningful, data-driven solutions.

SKILLS

- Languages: Fluent in Japanese, Chinese, English, Indonesian — spoken and written translation.
- Technical: HTML/CSS, JavaScript/TypeScript, Python, basic computer troubleshooting/networking/repairing.
- Finance & Operations: Transaction monitoring, financial reconciliation, loss prevention, process optimization, risk analysis, and team collaboration.
- Soft Skills: Cross-cultural communication, adaptability under pressure, analytical problem-solving, organizational skills.
